

HPC: The Smart and Flexible Control Solution

The HPC Controller combines the power of cloud-based irrigation management and the convenience of modular functionality. One of its many advanced features is Predictive Watering® Technology, which adjusts irrigation schedules based on local, real-time temperature, rainfall probability, wind speed, and humidity. It's also EPA WaterSense® approved, so it saves energy while using 20% less water than standard models. For the ultimate in control, Hydrawise® Software integrates with Amazon Alexa™ for convenient voice commands to start, stop, and suspend irrigation.

Hunter®

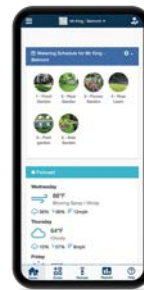

The **HPC Controller** has a 4" full-color touchscreen display. The user-friendly interface makes programming with or without Wi-Fi connectivity and manual start-up from the controller a breeze. It also has a built-in milliamp sensor for automatic wire fault detection and alerts.

MODELS:

**Plastic Indoor/
Outdoor Controller**

4 to 32 stations

- 4-station base model
- Wall mount

All Hydrawise enabled controllers are EPA WaterSense® approved when connected to Hydrawise web-based software. Built-in Predictive Watering Technology allows the controller to automatically adjust watering schedules based on local weather conditions to maximize water savings.

Compatible with:

**Station Expansion
Modules**

**EZ Decoder
System***

**HC Flow
Meter**

**Rain-Clik®
Sensor**

Hunter Industries is committed to manufacturing top-quality products that use only the water and energy needed to get the job done efficiently. Learn more at hunterindustries.com.
